WEEKLY ACCOMPLISHMENTS REPORT

Student Name: Shamel G. Camposano **Week No. :** 1

Company Name: Savant-International Student Mobility **Inclusive Dates:** March 16 - 19, 2026

Task Done this Week:

During my first week, I concentrated on gathering initial requirements and conceptualizing a completely new company system from the ground up. After attending orientation, I immediately began outlining the user flow and overall system structure. Starting with a blank slate, I identified the primary modules and initiated the drafting of preliminary wireframes in Figma. This established a clean, modern foundation for the system's user interface and set the direction for further development.

New Skill/s Acquired this Week:

- Learning new features in Figma
- Learn some CSS
- Mastering the workflow of exporting SVG and PNG assets from Figma specifically for development use.

Your major accomplishments this week:

TASK/S	ACCOMPLISHMENTS
• Started the Front-End • Add some wireframes in Figma • Refining visual elements in Figma • Ensures website professional and visually appealing design • Enhancing the website layout using Figma to make it more user-friendly	• Submitted the first draft layout of low-fidelity UI wireframes to my supervisor for initial feedback. • Successfully coded a homepage that matches the pixel-perfect design from Figma. • Translated the design system (colors, typography, and spacing) into a centralized CSS file/variables.

Problems encountered this Week:

- Encountering responsiveness issues where the coded layout didn't automatically adjust like Figma's Scale constraints.

Ways done to overcome or solve those problems:

- Used Browser Developer Tools (Inspect Element) to debug layout issues and tested different media queries for mobile responsiveness.

List one or two goals you set for yourself next week:

- Finalize the high-fidelity UI design for the core modules using a modern, minimalist aesthetic.
- Complete the coding for the remaining sections of the landing page (Features and Contact sections).
